# Find a Folder Address on your Mac

1 Control + Click on the folder whose address you want
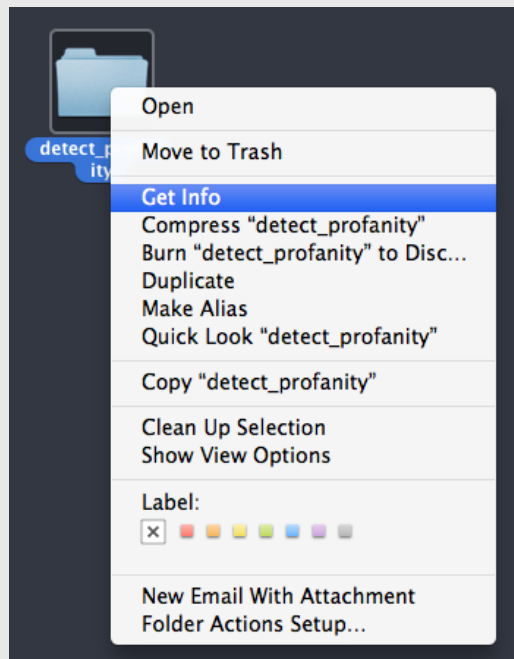

2 Select "Get Info"

Find a Folder Address on your Mac

3

In the information panel that appears, select and copy (Command + C) the folder address.

To that path add the name of the folder and the file name in this way: "/detect_profanity/movie_quotes.txt"

In this example the file address would be:

/Users/Grant/Desktop/detect_profanity/movie_quotes.txt

4

You can use this address in the function open.
